UTSW UT Southwestern Medical Center
Published by UT Southwestern Medical Center · February 13 at 8:55 PM · 🌐

One year ago, UT Southwestern released the first-ever heart transplant video presented with a 360-degree view. Filmed at William P. Clements Jr. University Hospital, the video details the process of a heart transplant and all its intricacies, with narration from our Transplant team, including Drs. Matthias Peltz, Pietro Bajona, and John Murala. Explore the interactive video from every angle and with never-before-seen views inside the operating room.
