

## CONTACTLESS FILMING

# Stand Out in a World of Webcams

DHD Films has innovated past the limitations of social distancing to bring you quality visuals without the presence of a film crew. Our Contactless Filming Solutions are designed to maximize the impact of the content you need to deliver while minimizing your exposure due to travel or physical contact.

### Mobile Production Studio

The full power of DHD in one mobile setup. A DHD team member will arrive at your preferred location with the lights, 4K camera setup, and audio equipment necessary to capture your talent at their best. The Mobile Production Unit will be assembled, sanitized, and wheeled into place. All you need to focus on is your message. Our creative team will monitor the shoot and provide any feedback remotely in real-time.

#### Real-Time Feedback

A director of photography and a producer come standard with each deployment of the Mobile Production Studio to address everything from framing to line delivery.

#### De-Risk Your Content

Our extensive inventory of studio equipment can be leveraged to meet any project requirements. Green screens, custom backdrops, teleprompters and more can easily be added to the package.

#### Local

The MPS is designed to be deployed in any major metropolitan area in the country. Our team can deliver the full setup to your preferred location, on your schedule.

### Mail-In Camera Kit

Our truly contactless solution. Elevate the visual wow factor of your video calls or virtual event presentations with this easy-to-assemble kit that shrinks the perks of a studio environment to fit on any desk. Our kit can be mailed right to you or your talent's door. When finished, simply place everything back in the box and use the included return label to ship everything back to us. It's that simple.

#### Easy Assembly

Video instructions come packaged right in the box. Strategic placement of lighting and the camera will elevate any webcam look in minutes!

#### De-Risk Your Content

Stream messages at a higher quality, record in 4K for a later broadcast, or stream and capture simultaneously. Our editors can add even more oomph to the content when it's shipped back to us.

#### Global

The Mail-In Camera Kit can be shipped anywhere in the world. Location is no longer a concern when booking talent or presenters for your next virtual event.
